

# Crescendos Alliance

Rural Peru, is building infrastructure.

The Crescendos Alliance is working in Peru to bring education, medical care, and community infrastructure to people in rural communities.

They are gathering Spanish-language books & school supplies for students. The skills they gain will help them find higher-income employment & achieve a long-term better quality of life.

Many of the children of these regions are eager to learn literacy skills but don't have basic tools to do so. We provided the funds to purchase a complete school supply backpack, including pens, pencils, paper, and books for 100 Peruvian students.
